770 VAN NESS #206
San Francisco
California, 94102

EXPERIENCE

AVG Technologies, August 2012 - Present

Web Designer, User Experience

- Responsible for planning, designing user interfaces for data analytics platforms, and ecommerce websites. Day to day tasks include: wireframes, flowcharts, high fidelity designs, as well as building prototypes with HTML and CSS
- Worked closely with the development team while coordinating projects with live data

PROFILE

A highly motivated and versatile designer who works effectively with a team or on his own. Loves communicating to get the job done, and believes that constructive criticism is an important part of a productive work flow. Produces high quality work consisting of both function and aesthetic elements. Technical and flexible skills, with an attention to pixel-perfect detail. Up to date with the latest technology in this fast paced industry.

EDUCATION

Academy of Art University, San Francisco, California
BFA Web Design & New Media, 2008-2013
